

## VISION

To provide improved usable visual streetscape and tree planting that embrace the sense of the place and it's regional uniqueness within the South Burnett.

## DESIGN INTENT

The landscape design of the streetscape will embrace the local historical context and environment of the town through:

- The use of earthy colours in the pavements.
- The rural feel and use of robust 'timber look' aluminium furniture.
- Improved shading and natural cooling through the introduction of street trees.

The plant species selection will reflect the rural character of the local environment using mainly endemic species.

## DESIGN STRATEGY

- Introduce new tree planting that provides a visual 'softening' and creates visual cues to slow traffic whilst travelling through the town.
- Provide a safe crossing location at the northern part of the Scott Street - to discourage unsafe crossing at the southern part of the street.
- Provide shady seating and bin enclosures to encourage more 'foot traffic' visitations to the shops.
- Provide improved outdoor dining opportunities and more pleasant look and feel.
- Plant species that reflect the local environment.

Existing view approaching the town from the north

Historical view of Wondai (looking north) with the Bank on the left and museum on the right. Date unknown. Source - Wondai Heritage Museum

Existing outdoor dining opportunities will be improved through the street upgrade

Existing street with awnings. Existing street furniture to be replaced
